This office action is responsive to communications filed 04/27/2005.

Claims 1 – 18 are pending.

1. Claims 1 – 18 are allowed.
2. The following is an examiner's statement of reasons for allowance: the prior art of record neither shows nor teaches a combination for the claimed (a) pressure relief valve that comprises in combination with other recited elements, a stationary fluid injector stab extending through a side of the pressure chamber and sealingly engaging a central bore of the moveable valve member, the injector stab having a stab port extending through a sidewall, the stab port being in communication with a valve member port extending through a side of the valve member in the valve open position and being sealed therefrom in the valve closed position or (b) a method of relieving a pressure of a system fluid in a pressurized system line that comprises in combination with other recited steps, stationarily mounting an injector stab with a tubular portion of a moveable valve member and injecting pressurized fluid through the injector stab into a pressure chamber on a side of a pressure barrier, the barrier being connected to the valve member, thereby delaying the return of the valve member to its closed position and venting the pressurized fluid from the side of the pressure barrier as the valve member returns to its closed position.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 3753

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
